

5 YEARS. ZERO ACCIDENTS.

WHY 33 FT TRAILERS ARE THE FUTURE OF FREIGHT.

OPERATING SINCE
2010
Florida Turnpike

SAFETY RESULTS

0 ZERO
ACCIDENTS

MILES DRIVEN

1,300,000 ORLANDO
to MIAMI

ENERGY CONSERVATION REDUCTION

7,200 GALLONS
of fuel per week

REDUCED CONGESTION

3 FEWER
TRIPS
PER WEEK

1200 FEWER
MILES
PER WEEK

The Facts Speak For Themselves

Since 2010, FedEx has been operating 33ft trailers on one of the nation's busiest highways. In this time, these vehicles have been driven over 1.3M miles, and with their increased capacity, have saved over 7,200 gallons of fuel a week. It also means that our vehicles take three fewer trips a week, meaning that there are fewer vehicles on the road.

Our trailers are paving the way towards a more sustainable future for ground freight. But the real story is public safety. On a stretch of highway that reports around 126,000 roadside event responses a year, our 33ft trucks have zero accidents. None.

It's time that we open up the rest of America's highways to the future of freight transportation. It just makes sense.
